## COLOUR MONITOR TELEVISION

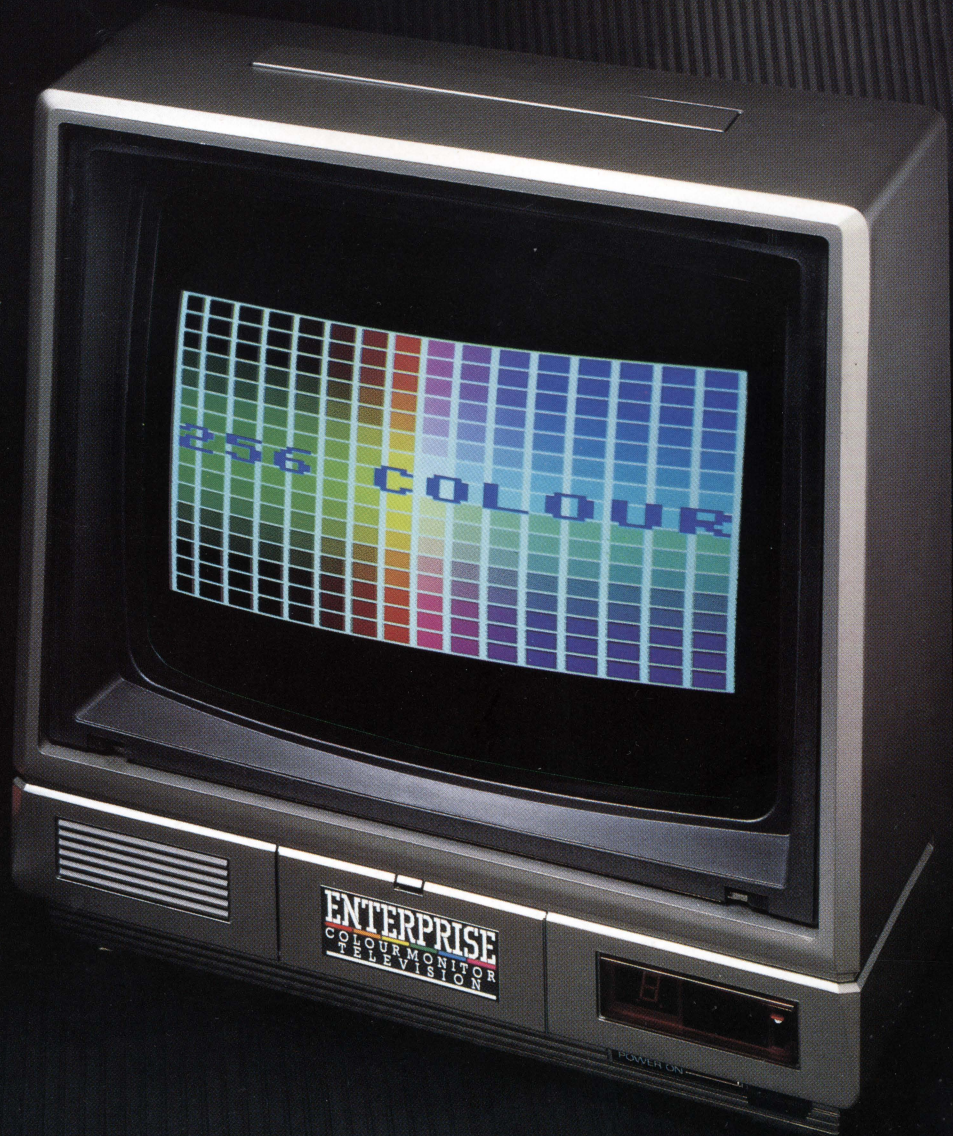

The Enterprise Colour Monitor and Television is one of a range of high quality peripherals for the Enterprise 64 and 128 Home Computers.

It is attractively designed with a high brightness 14" tube and in-built circuitry to give outstanding performance both as a computer monitor, showing off all the Enterprise's 256 colours, and as a TV.

Its features include:

- Standard resolution Monitor circuitry
- Full colour UHF channels 21-69 TV Reception
- Anti-glare tinted glass screen
- 21 pin Euro connector for connection to your Enterprise
- Standard loop TV aerial
- Audio amplifier and speaker

Designed and manufactured in the United Kingdom

### Specifications

Tube size	14" (33cm 'V')*
Power supply	220-250V AC 50 Hz with 2 core mains lead
Power consumption	65 watts
Aud. power output	2 watts
Coverage	UHF channels 21-69
Tuner	Electronic varicap with voltage synthesized tuning and AFT
Picture tube	14" 90° High brightness in-line CRT
Manual controls	Self convergence, Full pin cushion correction
Sockets	8 channel push button selector, LED channel display
Chassis	Volume, Colour, Brightness, Contrast, On/Off
No. of lines	Aerial socket and 21 pin Euroconnector (SCART type)
Line freq.	Isolated with auto black level control
Video band width	625
Geometric Raster Distortion	15.625 kHz
Shadow mask pitch	12 MHz
Composite video input	Within ± 1.5%
Direct RGB input	0.63mm
Audio input impedance	TV P.P. neg going sync pulse 75 ohms
Size Width mm (ins)	TV P.P. into 75 ohms
Unit Height mm (ins)	200 mV 5k ohms
Depth mm (ins)	375 (14 1/4)
Weight	375 (14 1/4)
	390 (15 3/8)
	12kg (26 lbs)

\* 'V' indicates visible screen size measured diagonally in centimetres
