ENTERPRISE EXPANDABLE DISK OPERATING SYSTEM

The Enterprise Disk Controller (EXDOS) is one of a range of high quality peripherals for the Enterprise 64 and 128 Home Computers.

The superb specification and flexibility of the controller will enhance your Enterprise and demonstrate that the Enterprise range has *Obsolescence Built Out*.

Features:

- Compatible with any Shugart 410 interface disk drive
- Will drive up to 4 3½" or 5¼" drives and any combination of double or single sided, 40 or 80 track disk
- Fast, random access file retrieval

- Compatibility with MS-DOS file formats allows reading of disks from many popular micro-computers, including the IBM-PC, APRICOT and ATARI 520 ST
 - The IS-DOS operating system gives the option of compatibility with C/PM 80 programs
 - Full directory, sub directory and 'disk housekeeping' facilities
 - And many other advanced features
- GIVE YOUR ENTERPRISE THE POWER AND SOPHISTICATION OF A BUSINESS MICRO AT A FRACTION OF THE COST*
