

ENTERPRISE

— M O U S E —

The Enterprise Mouse is an advanced computer control device and graphics package to interface with your Enterprise 64 or 128 Home Computer. Part of a wide range of peripherals, the Mouse ideally complements the full features of the Enterprise system.

- Highly advanced technical specification
- ICON driven software to operate the mouse and graphics package included.
- Excellent graphics software with many advanced facilities
- Smooth, accurate movement, with 3-button control

- Can be configured to operate with your own software

An ideal peripheral for use at home or integrated with the Enterprise range of business peripherals.

Designed and manufactured in the United Kingdom
